

TOP 200 MSN NURSING CAPSTONE PROJECT IDEAS

- 1 Public health advocacy for pregnant minorities
- 2 Clinical techniques in making anesthesia more safe
- 3 Development of the nursing assessment tool
- 4 Improving education around HPV and its vaccine
- 5 Relation of STDs among women in relation to behavioral health issues
- 6 Effective wound care for patients
- 7 Patients with an altered body and their psychological assistance
- 8 Specific immunization regimen with systematic instruction
- 9 Preventing infections in healthcare establishments
- 10 Handling diabetes in young children through testing qualitative methods
- 11 Psychological assessments, specifically with depression
- 12 Addressing cross-cultural and generational diversity in nursing training
- 13 Ambulatory care settings with strategies for quick response
- 14 Promotion and education of breastfeeding practices
- 15 Research in home transfers
- 16 Recognizing risk factors tied to bottle and breastfeeding for premature infants after intensive care
- 17 Difference between modern and old healthcare
- 18 Education for chronic obstructive pulmonary disease
- 19 Online learning VS classroom of nursing
- 20 Cardiac skills for teens
- 21 Concept-based learning strategies to create nurse leaders
- 22 Study of nurses with multicultural backgrounds in clinical settings
- 23 Concept advancement of nursing care management
- 24 Use of tents for birthing babies
- 25 Using evidence-based childbirth guidelines for volunteer healthcare

- 26 Evaluating the effectiveness of nursing training
- 27 Mental health referral practices in family medicine clinics
- 28 Giving transition of shock training to patients
- 29 Integration of medical strategies to promote and influence breastfeeding
- 30 Development of Vitamin D deficiency screening for patients with history of osteoporosis
- 31 Relationship between longer hospital shifts of nurses and quality of patients care
- 32 Prevention and management of Type 3 Diabetes
- 33 Lyme disease prevention among children
- 34 Increasing access to care for pregnant women
- 35 Improving pain management among nurses
- 36 Education and asthma care in nursing homes
- 37 Education program of asthma among students
- 38 Non-pharmaceutical management of psychological systems
- 39 Inventional program for treatment of obesity
- 40 Discharge planning for nursing students and its improvements
- 41 Study of dementia patients and preventing dysfunctional behaviors
- 42 Cardiac skills and clinical utility
- 43 Developing a discrepancy audit tool for medical reconciliation discrepancy
- 44 Checklist for adolescents transitioning out of intensive inpatient care
- 45 Addiction of stimulants in adolescents
- 46 Palliative care patients in emergency department
- 47 Emergency department utilization among palliative care patients
- 48 Development of tools for survival in novice neurosurgery
- 49 Developing a survival tool for novice neurosurgery practitioners
- 50 Children with disorders such as bipolar disorder or ADHD

- 51 Bipolar disorder and ADHD children
- 52 Management in nursing involving women's health issues
- 53 Nursing management towards women's health issues
- 54 Development of personalized approaches for sleep disorder in aging patients
- 55 Personalized approaches to sleep disorder management during aging
- 56 Interactions in healthcare
- 57 Clinical and health outcomes in managed care
- 58 Dementia behavior in older patients
- 59 Nursing methods in the care of an older patient
- 60 Medicine for environmental and occupational conditions
- 61 Environmental and occupational medicine
- 62 Differences between treatment and assessment
- 63 Sleep apnea screening in patients and connections to heart failure
- 64 Relationship between nursing certification and sense of competition
- 65 Review of visitation models within the context of patient- and family-centered care
- 66 Study of sexually transmitted diseases
- 67 Strategies planning approach for patient-centered medical facilities
- 68 Use of probiotics in prevention of diarrhea
- 69 Promoting infant health through breastfeeding support
- 70 Prevention of rehabilitation readmission of stroke patients
- 71 Improving medical knowledge about HPV and vaccines
- 72 Medication management intervention across care changes
- 73 Disease outbreaks and protective measures for healthcare
- 74 Role and performance of men in nursing occupation
- 75 Healthcare facilities and instructional programs

- 76 Effective critical care response in handling medical emergencies
- 77 Attitudes and beliefs about diabetic foot programs
- 78 Quality of life in patients with prostate cancer
- 79 Pain assessment tools for adult patients
- 80 Literature review of cardiovascular disease and stress
- 81 Impact of nurse-to-patient ratios on patient care outcomes
- 82 Clinical utility of cardiac skills checklist for teens
